

Luke Garceau
Miguel Miranda-Gonzalez
Zackary Gerald

Goal:

Goals would be to have a lightweight application that has a search bar and persistent storage for search completion, a middleware piece for handling the database interactions, and potentially a back end for retrieving new pokemon for the database.

Notes:

Non-intuitive features:

- Fetching data from database - Luke, Miguel
- Displaying pokemon images - http get request- Luke, Zack
- Populating the application list of pokemon (retrieving pokemon names from DB)- Zack, Miguel
- Retrieving selected pokemon information from DB- Luke, Miguel

Intuitive Features:

- Filtering- Zack, Miguel
- Searching- Luke, Zack
- Selecting- Luke, Miguel
